## PROJECTS

### Responsive Portfolio — *using html, css and js*

Most of the people learn many designing parts in a portfolio website and I will create my portfolio using minimum codes and best output. if you want see live [click here](#) or Source code [click here](#)

### Book Shop — *using html, css and js*

I will create an ecommerce website without back-end work Because I'm not fully fluent in Php. The reason I created the website is to use the front-end only but I got the best output. if you want see live [click here](#) or Source code [click here](#)
